Good morning,

The Pre-RD group along with support from the NRC crew has just departed SIL. There are a total of 12 receivers left to locate, 10 of which are acoustic releases. A Vemco representative is joining the crew today to troubleshoot and update equipment firmware and replace any parts that need attending to. The Next Generation vessel is heading to RM 11 to start off the day. Pre-RD is aiming to locate (at least) 6 acoustic releases (AR's) today, however, they anticipate dragging with a grappling hook for several of the AR's, and therefore predict a longer field day. Included is a photo of the health and safety meeting led by AECOM at SIL. A Life ring, AED, radio, first aid and required H&S items have been located on the vessel.

Jonni
